Overview

WIDAT Group, L.L.C. was founded by Christopher O. Mantle in July of 2003, and is a registered Internet investment advisor committed to providing institutional clients with high quality independent equity research in the Wireless Telecommunications Industry.

The WIDAT Group believes various trends are blossoming in our society that will change the way we communicate. Our Voice only networks will be upgraded to provide a rich Broadband experience. Networks will have to become device agnostic. Devices will be able to roam the globe, and have speedy “always on” connections. A time of ubiquitous global broadband will exist. People will be able to conduct their lives, businesses, healthcare solutions, entertainment needs, and many other activities in real-time from anywhere on the globe.

WIDAT Mission

Our Mission at WIDAT is to monitor, evaluate and offer our opinions on these trends. We will employ a macro approach utilizing fundamental analysis to identify various activities in the different segments of the emerging wireless industry.

We provide our analysis, on a subscription basis, to investors in 3 formats: Weekly Commentary, Quarterly Market Studies, and Independent Research.

Wireless Universe Screening over 400 Stocks:
